**The City of Norwood Payneham & St Peters is interested in your views regarding the possibility of introducing a 40 kph speed limit along all streets which are under its care, control and management.**

In this respect, broadly speaking, the proposal is as follows:

- Introducing a 40 kph speed limit along all suburban roads within the City.
- The proposed 40 kph speed limit would exclude the named main roads, as shown on the map.
- The proposal would not change the 25 kph speed limits which apply to School Zones.
- As a 40 kph speed limit currently applies to the Stepney Triangle (area marked black on map), no change is proposed for this area.

*Map of proposed 40 kph speed limit area (excluding named main roads).*

**The main reason for considering the introduction of the 40 kph speed limit is to improve amenity and safety for its Citizens by lowering the speed limit.**

The Council is seeking your views as an initial step in its consideration of this proposal. Should the community support this initiative then the Council will consider pursuing the proposal further. This would include developing detailed designs for individual streets which, in addition to the lower speed limit, could require the implementation of traffic calming measures such as linemarking, signage or physical devices (e.g. chicanes). If this were to occur, community consultation would also be undertaken as the next step.

In order to introduce a lower speed limit the Council requires approval from the Minister for Road Safety. An application to the Minister, seeking approval for the 40 kph limit would need to be made, and as part of this process, would need to provide certain details including the results of the community consultation processes.

The Council has commissioned McGregor Tan Research to undertake this initial community consultation process through conducting and collating responses to this survey of all its citizens and property owners. The survey is conducted in compliance with the Privacy Act. The report which is to be submitted to the Council by McGregor Tan Research, will outline its analysis of the survey responses. The report will be made publicly available with no individual answers attributed to any individual participant in the survey.

**Please complete one survey only per household or business.**

You can complete the survey online by either scanning the QR code or copying the link to your web browser and entering the Survey ID listed below. Alternatively the completed Survey Form (attached) can be posted back in the prepaid envelope provided, or you may drop it into a survey box at one of the following locations:
